FinePrint Model Card

Task:
Explainable Detection of Potentially Unfair Terms-of-Service Clauses.

Intended Use:
Educational screening tool. Not an assessment of legal enforceability or compliance.

Dataset Provenance:
LexGLUE unfair_tos (https://huggingface.co/datasets/coastalcph/lex_glue).
Train/Val/Test retained counts: 5427/2243/1562

Model Details:
TF-IDF Vectorizer + OneVsRest LogisticRegression. Features: 19987
Thresholds tuned on validation set: [0.75, 0.7, 0.8, 0.65, 0.6, 0.7, 0.5, 0.7]

Overall Test Metrics (Multi-label):
Micro-F1: 0.7303
Macro-F1: 0.7449

Binary Task (Any Flagged):
Precision: 0.8477, Recall: 0.7665, F1: 0.8050

Subgroup Audit (Word Count Length):
Short clauses (n=792, prev=0.073): Multi-Macro-F1: 0.5804
Long clauses (n=770, prev=0.142): Multi-Macro-F1: 0.7533
Finding: Comparing 792 short clauses with 770 long clauses, the multi-label macro-F1 gap is 0.1729.

Limitations:
Domain limited to older platform terms. Unflagged is not proven fair.
